

Pakistan Journal of
Cardiovascular & Thoracic Surgery

Quarterly - Oct - Dec, 1999

Volume: 1

No. 1

EDITORIAL

The advancement in the field of cardio thoracic surgery in past decades have surpassed the achievements of centuries. Similarly old hypotheses have been replaced by new concepts. An ever increasing number of the most advanced equipments are being marketed. New advanced surgical techniques have revolutionized the management of cardiovascular diseases.

The print media being traditionally and probably the best way of transmission of knowledge around the world. Text books however are no longer able to fulfil this need, perhaps the best way to provide the most advanced, and state of the art information is through Journal.

So many journals are on various aspects of Cardiovascular & Thoracic Surgery being published around the world. We shall have to continue to absorb knowledge from them to keep up with recent advancement in the field of Cardiac Surgery, because even the developed nations are learning from each other. The Society of Cardiovascular & Thoracic Surgery, a professional association is dedicated to promote scientific knowledge and research in Cardiovascular & Thoracic Surgery. This journal of the Society will provide a forum for experts in the field of Cardiovascular & Thoracic Surgery to exchange knowledge , results of research, and new advancement of technology with each others. We need to produce quality journal of our own to provide for our research and development needs.

This journal will publish standard research material provided by experts in the field of Cardiovascular & Thoracic Surgery.

We hope the professional experts will extend their full cooperation to enable us to achieve this goal.
